## Composite Predictions from Sun-Sign and Root Number

### General :

Your Sun-Sign is Aries - which is governed by the fiery planet Mars. Your Numeral Category is 4 - which number is governed by the eccentric planet Uranus. The combination is a highly powerful one - although quite typical and no less queer. In one hand, Mars will make you bold, courageous, dauntless, energetic, and enthusiastic; on the other hand, Uranus will infuse great contradictions in almost all the affairs of your life. You will remain evergreen and forever young, and your fate might play its role in such a fickle manner that you might soon become quite accustomed to expect the very unexpected things to happen to you as rather 'normal' happenings in your life. You will always tend to feel very restless, and will continually go on shifting not only your plans, but also your views, opinions, objectives, and even ideals. You will have many changes in your profession, and your workplace as well; your financial standard might keep on swinging; your environment, and the circle of friends and acquaintances will also change consequently. You will feel closely drawn to persons born on dates of the 4-series and 8-series - i.e., on dates ( 4 or 13 or 22 or 31 ) and ( 8 or 17 or 26 ) of any month.

You will be very unconventional in your views, and some of your ideas might be quite radical - although those could be branded as advanced nevertheless; yet you will always remain very original in your thoughts and expressions. It will also not be at all easy for you to accept anybody else's advice - as you will have your own unique way of looking at things. In case of discussions, you will tend to express obverse view in any argument and may resent anyone - who is not in agreement with you. In respect of matters like philosophy and religion also, you may develop some newer ideas of your very own. With your brusque manners, you may hurt other people's feelings - although without intending to do so. Although you won't antagonize people owing to clash of interests, yet some people may become unfavorably-, or even inimically-, disposed towards you - for which reason, you may meet with much of opposition, or even face some troubles owing to their underhand actions. You should therefore do rather better if you try to become more tactful and diplomatic.

Because of your inherent peculiarities, you may not form friends very quickly- although for your queerness you will be able to turn many heads, and some of them may become your acquaintances. In most cases, the relationships may not last long - unless you do have something really in common. Some of your friends may be somewhat peculiar or even odd, and you may have some distinct differences in some way or other - like age, community background, educational standard, socio-economic level, religious belief, etc. In case of marriage too, you might startle even your own people by your spectacular choice - which might be 'remarkable' in more ways than

dsfgfdgdfg

one.

Your mind will be fertile, inventive and ever wandering; you will be very much fond of the most recently invented equipments, and you will remain abreast of the latest scientific and technological developments; electrical devices and electronic equipments might attract you most. You will also be an avid reader - having a taste for literature. You will always remain very curious about anything new - persons, places, and things; you will feel the unquenchable thirst for meeting with people-, going to the places-, and acquire some articles-, that are essentially foreign.

### Finance :

As you have a very independent nature, you may soon find that working under somebody is difficult, and working with others also not very convenient. As such, even if you remain in service in the beginning, you will wish to be in an independent profession at the earliest. You will be cautious in respect your expenses, and might be considered as a close-fisted person; besides, you will invest your money in prudent manner for making your future secure. You will be a successful person, and may opt for retiring from active profession relatively early.

### Health :

Your working pattern might be quite unusual. At times, you will go on straining yourself with overwork - while at some other times you may feel too listless to make any effort at all. This type of irregularities is very much likely to tell upon your health. You are thus likely to suffer from mysterious kind of illnesses - which are either difficult to diagnose or difficult to cure. Taking exercise regularly, sticking to the simplest form of diet, and getting back to nature will keep you in good stead.
